## **Propane Tank Lock**

The California propane tank lock securely locks propane tanks when mounted to trailers, towables and RVs. Propane tank theft is on the rise and this product helps you to avoid common propane tank theft and repairs that can exceed \$500. Not only are criminals stealing propane tanks, they are also damaging the RV extensively to remove the tanks by cutting the lines resulting in significant damage. California Propane tank Lock does not require tools for installation and only takes seconds to install. The propane tank lock does not interfere with LP tanks. It is designed for dual tanks and is powder coated caution yellow. It works with the most common threaded rods found on RVs today. It's the best lock available specifically designed for LP tanks in the industry and is proudly made in Canada .
