

PARKING ENFORCEMENT

California Immobilizer™
- Protecting your investment -

THE - ENFORCER -

SIGNS & DECALS

We offer parking enforcement signage in both aluminum and styrene along with reusable static cling decals for placement on windshields. More information available on-line.

THE "ENFORCER" COMES IN THREE SIZES

Low Profile Cars - Type 1

Fits wheel sizes 18" to 25" tire with widths from 6" to 10"

Normal Profile Cars - Type 2

Fits wheel sizes 20" to 26" tire with widths from 7" to 11"

SUV/Truck Profile - Type 3

Fits wheel sizes 26" to 35" tire with widths from 8" to 14"

EASY EFFECTIVE PROTECTION

The California Immobilizer "Enforcer" model has been designed with the parking enforcement industry in mind. Made tough with steel and welded. The "Enforcer" can be easily adjusted to accommodate different wheel widths and wheel heights. These adjustments cannot be compromised, the adjusting pins are concealed by the tire and those pins are not accessible when the "Enforcer" is installed. The "Enforcer" acts as a wheel chock, the vehicle cannot move when the "Enforcer" is installed and the wheel cannot be removed, the lug nuts are concealed.

It is easy to install and just as easy to remove after collecting the unlocking fee. This system eliminates the need to involve towing or storage (compound) fees making it the ideal parking enforcement program. The "Enforcer" can be keyed-a-like.
